

15 billion years ago

Rock was materialized.

15,000 years ago

Man builds house out of rock.

150 years ago

Man builds bigger house out of rock.

Today

Man makes stronger buildings out of rock.

Introducing
SHEETROCK Abuse-Resistant Gypsum Panels.

Built for better resistance to surface indentations and penetrations. The core is encased in a heavy paper that is folded around the edges to reinforce and protect the panel. These extra strong panels are recommended for commercial and institutional construction where durability and fire resistance are required.
